

Staff Quick Guide — Grocery Associate

Role: Grocery Associate **Access:** Grocery POS (scan and desk mode), customer management, receipt printing, stock receiving, salesperson EOD report **For full documentation:** See [docs/user-guide.md](#)

Your Day at a Glance

Clock In → Open POS → Serve Customers → Receive Stock (if delivery arrives) → Submit EOD → Clock Out

1. Clock In

Fastest method — scan card:

1. Point your employee barcode card at the scanner at any time.
2. A clock-in popup appears (it does not interrupt anyone else's work on screen).
3. Look briefly at the camera — your photo is taken automatically.
4. Confirm **Clock In**.

Without a card: Go to **Employees** → **Clock-In**, find your name, and click **Clock In**.

Forgot to clock in? Tell your manager right away with your actual arrival time.

2. Open the Grocery POS

In the left sidebar, click **Grocery** → **POS**.

The POS has two modes — you switch between them using the  **Desk Mode** button in the top bar.

Mode	How items are added	When to use
Scan Mode (default)	Scan barcode or type PLU code	When you have a physical barcode scanner
Desk Mode	Tap product cards on screen	Counter service, or when the scanner is not available

3. Serving a Customer — Adding Items

Scan Mode

1. Point the scanner at the product barcode.
2. The item is added to the cart automatically.

3. If a barcode is not found, you will be prompted. Ask a manager — the item may need to be stocked first.

Desk Mode

1. Click a category tab on the left to filter products.
2. Tap a product card to add one unit. A **blue badge** appears on the card showing how many are in the cart.
3. Tap again to add more units.

Stock badges in Desk Mode — each card shows a count in the corner:

- Grey "42 left" — normal stock
- Orange "3 left" — low stock, flag to manager
- Red "Out of stock" — cannot sell; skip or substitute

Sell by Weight

For items sold loose (e.g., rice, flour):

1. Make sure the  **Scale** panel is visible (click the scale button in the top bar if not).
2. Tap the product card — a **Weigh Item** modal opens.
3. Place the item on the scale. When the weight stabilises, tap **Add to Cart**.

4. Adjusting the Cart

- **Change quantity:** Use + or – buttons on the item in the cart.
- **Remove an item:** Click the bin icon.
- **Apply a discount:** Click the item price and choose a percentage or fixed amount.

5. Link a Customer (Recommended)

Click **Select Customer** above the cart.

- Type their name or phone number and select from the results, or
- Scan their loyalty card barcode — they are selected instantly.

If they are new:

1. Type their name → + **Add New Customer**.
2. Enter name and phone number → **Save**.
3. Print their loyalty card and hand it to them before they leave.

Walk-ins with no customer? Leave it blank and proceed — the sale is still complete.

6. Process Payment

Click **Charge** or **Pay Now**.

Method	How to use
Cash	Select Cash. Enter the amount given — change is calculated automatically.
EcoCash	Select EcoCash. Enter the amount sent and record the transaction code when prompted.
Split	Click both methods and enter the amount for each part.

Cash Rounding

If the total doesn't land on a round number (e.g., \$1.74 with a \$0.50 step), an amber panel appears:

- **Apply Rounding** — round up to the next boundary (e.g., \$2.00).
- **Round down** — customer pays the lower round amount (e.g., \$1.50).
- **Keep** — charge the exact total.

Very small gaps (e.g., \$0.03) apply automatically.

Click **Complete Sale**.

7. Print the Receipt

A receipt preview appears. Choose:

- **QZ Tray Printer** — prints directly to the till printer (fastest).
- **Browser Print** — opens a print dialog.

Click **Print Receipt**. If the customer doesn't need one, click **Skip**.

8. Receiving a Delivery (Bulk Stock)

When stock arrives and you need to update inventory without closing the POS:

1. Click  **Bulk Stock** in the top bar of the POS.
2. Scan or search for the product.
3. Enter the quantity received and the cost per unit.
4. Click **Save**.

Stock levels update immediately. Labels can be printed from **Grocery** → **Inventory** → **Print Labels**.

You need the **Can Receive Stock** permission to do this. If you don't see the Bulk Stock button, ask your manager.

9. End-of-Day Report (if required)

If your manager has enabled salesperson EOD:

1. Go to **Sidebar** → **EOD** → **Submit Daily Report**.
2. Select today's date.
3. Enter your **Cash Total** — all cash you physically collected today.

4. The **EcoCash Total** fills in automatically — check it looks correct.
5. Click **Submit Report**.

Submit before the deadline your manager gives you. If you made a mistake after submitting, ask your manager to correct it with an override.

10. Clock Out

Scan your card at the scanner and confirm **Clock Out** on the popup.

Quick Fixes

Problem	What to do
Barcode not found	Try typing the product name in the search box. If still not found, tell a manager — the item needs to be stocked.
Product shows "Out of stock"	You cannot sell it. Advise the customer and flag it to your manager for restocking.
Wrong item in cart	Click the bin icon to remove it.
Scale not reading	Check the green dot is showing in the scale panel (connected). Click Tare to reset the scale, then try again.
Can't find Submit Daily Report	Ask your manager to enable Salesperson EOD in Business Settings.
Customer loyalty card not scanning	Type their name or phone number manually.

Questions? Ask your manager or refer to the full guide at <docs/user-guide.md> — Section 2 (POS), Section 21 (Grocery Desk Mode), and Section 30 (Salesperson EOD).
