

Staff Quick Guide — Restaurant Salesperson

Role: Restaurant Salesperson **Access:** Restaurant POS, customer management, receipt printing, salesperson EOD report **For full documentation:** See <docs/user-guide.md>

Your Day at a Glance

Clock In → Open POS → Take Orders → Process Payment → Print Receipt → Submit EOD → Clock Out

1. Clock In

Fastest method — scan card:

1. Point your employee barcode card at the scanner at any time.
2. A clock-in popup appears (it will not interrupt someone else's sale).
3. Look briefly at the camera — your photo is taken automatically.
4. Confirm **Clock In**.

Without a card: Go to **Employees** → **Clock-In**, find your name, and click **Clock In**.

If you forget to clock in, tell your manager immediately with your actual arrival time so they can correct the record.

2. Open the Restaurant POS

In the left sidebar, click **Restaurant** → **POS**.

The screen has two panels:

- **Left** — the menu grid (products and categories)
 - **Right** — the cart (items selected for the current order)
-

3. Taking an Order — Adding Items

By category: Click a category tab (e.g., *Mains*, *Beverages*) to filter the menu grid. Tap a product card to add it to the cart.

By search: Type the item name in the search box at the top. Click the result to add it.

By barcode: Scan the product barcode — it is added to the cart automatically.

Adjusting quantity: Use the + and – buttons on a cart item, or remove it with the bin icon.

Today's Special

If a Today's Special is running, the item appears in the grid with an amber ★ **TODAY'S SPECIAL** badge and a discounted price. Add it to the cart the same way as any other item — the special price applies automatically.

4. AYLI Combo (Weight-Based Combo)

AYLI combos have a green 🚰 **AYLI** badge and are sold by weight. When a customer orders one:

1. **Tap the combo card** (e.g., *Mama's Choice*). The AYLI modal opens full-screen.
2. **Place the empty container** on the scale — it auto-tares after 2 seconds. Or tap **Skip**.
3. **Select the size** — Small, Medium, or Large. Size cannot be changed after this step.
4. **Fill each ingredient:**
 - Tap the ingredient card (e.g., *Chicken*).
 - Have the customer add the food to the container.
 - Wait 2 seconds. The scale readout shows the weight being added and its cost.
 - Check the line at the bottom: **New total: \$X.XX + \$Y.YY to reach \$Z.00** — this tells you how far you are from the next round-dollar amount.
 - Tap the green ✓ **Capture** button to lock it in.
 - Repeat for other ingredients.
5. **Removing food:** If the customer wants less of something already captured, physically remove food from the container, tap that ingredient card again, wait for the red ✕ **Remove** button to appear, then tap it.
6. **Choose your rounding option** (appears at the bottom once ingredients are added):

Button	What it means
↑ \$X.XX (+\$Y.YY) (green)	Round the price up. The small difference is spread across ingredient prices. The customer pays the higher round number.
↓ \$X.XX (– \$Y.YY) (orange)	Round the price down. The exact weighed price stays on the combo. A separate "Cash Rounding –\$Y.YY" discount line is added to the cart — the customer gets a small courtesy discount.
Keep \$X.XX (grey)	No rounding. Use the exact calculated price.

Tip: During filling, watch the rounding gap shown under the scale readout. If you are \$0.04 away from a round number, a tiny bit more food can bring you to zero rounding needed.

7. After tapping a rounding option (or Keep), the combo is added to the cart automatically.

5. Link a Customer (Recommended)

Click **Select Customer** above the cart.

- Type their name or phone number and click their name in the results, or
- Scan their loyalty card barcode — they are selected instantly.

If they are new:

1. Type their name → click **+ Add New Customer**.
2. Enter name and phone number → **Save**.
3. A loyalty card button appears — print and hand it to them.

If they don't want to share details, leave it blank. The sale records as a Walk-In.

6. Process Payment

Click **Charge** or **Pay Now**.

Method	How to use
Cash	Select Cash. Enter the amount the customer hands you — change is calculated automatically.
EcoCash	Select EcoCash. Enter the amount sent. Record the EcoCash transaction code when prompted.
Split	Click both methods and enter the amount for each.

Cash Rounding (non-AYLI orders)

If the total doesn't land on a round number (e.g., \$2.62) and you didn't handle rounding in the AYLI modal, an amber panel appears:

- **Apply Rounding** — round up to the next boundary (e.g., \$3.00).
- **Round down** — give the customer the lower amount (e.g., \$2.50).
- **Keep** — charge the exact amount.

Small gaps (e.g., \$0.03) round automatically without you needing to tap anything.

Click **Complete Sale** when ready.

7. Print the Receipt

A receipt preview appears. Choose your print method from the dropdown:

- **QZ Tray Printer** — prints directly to the till printer (fastest).
- **Browser Print** — opens a print dialog.

Click **Print Receipt**. If the customer doesn't need a receipt, click **Skip**.

8. End-of-Day Report (if required)

If your manager has enabled salesperson EOD:

1. Go to **Sidebar** → **EOD** → **Submit Daily Report**.
2. Select today's date.
3. Enter your **Cash Total** — all cash you physically collected today.
4. The **EcoCash Total** fills in automatically from system records — verify it looks right.
5. Click **Submit Report**.

Submit before your manager's deadline (your manager will tell you the time). Once submitted you cannot edit it — if you made a mistake, ask your manager to correct it.

9. Clock Out

Scan your card at the scanner and confirm **Clock Out** on the popup.

Quick Fixes

Problem	What to do
Item not showing in menu	Search by name. If it genuinely isn't there, ask a manager to add it.
AYLI scale not reading	Check the scale is connected (green dot in the scale panel). Try tapping Tare to reset.
Customer loyalty card not scanning	Try typing their name or phone number manually.
Wrong item in cart	Tap the bin icon to remove it.
Payment screen shows wrong total	Check the cart for duplicate items and remove as needed.
Can't find Submit Daily Report	Ask your manager — they may need to enable the feature in Business Settings.

Questions? Ask your manager or refer to the full guide at [docs/user-guide.md](#) — Section 2 (POS) and Section 54 (AYLI).
